Summary

Results-driven Full-Stack Developer with a strong focus on backend architecture, specializing in Python, Django, and Django REST Framework. Proven track record in designing and optimizing scalable web applications, secure JWT-based authentication systems, and robust PostgreSQL databases. Adept at bridging backend efficiency with modern frontends like React and Vite, alongside a keen eye for data automation through web scraping and pipeline building. A collaborative problem-solver committed to delivering clean, maintainable code that drives seamless user experiences.

Education

Imam Khomeini International University Bachelor of Electrical Engineering
Qazvin, Iran • 2019 - 2023

Experience

Freelancer

Remote

Full-Stack Web Developer

2024 - Present

- Completed freelance projects in web development and programming for diverse clients

<https://freelancer.com>

Pars Eram

Tehran, Iran

Web Development Intern

2022 - 2023

- Focused on back-end development using Django and Django REST Framework

<https://Parseram.co>

Projects

TabloGenix

2026

- Built a full-stack electrical panel management platform with Django, DRF, React, and PostgreSQL, featuring JWT authentication, REST APIs, Redis caching, and Dockerized deployment.

<https://github.com/amirhamidi2001/tablogenix-ecommerce>

Roya Sazan Javan

2025

- Developed an educational platform with Django and React, featuring REST APIs, authentication, course management, and responsive frontend design.

<https://royasazanjavan.org>

Goriila Shop

2024

- Developed an e-commerce web application using Django, React, and PostgreSQL with authentication, product management, shopping cart, and responsive UI implementation.
